

We're the dot in .com™

*It's the people Sun Microsystems employ that make us such a powerful force in the world of enterprise computing.*

That's why we're seeking smart, enterprising, dynamic, proactive and **passionate IT students** to come and join us for **twelve-month internships**.

Not for the timid, these internships are hands-on from day one. You'll be solving problems, overcoming hurdles and *s t r e t c h i n g* your talents to their absolute limits. It's your chance to shine!

We are currently recruiting interns across Australia in various disciplines and are looking for *passionate and creative* IT students. You will be working with talented managers, getting your hands dirty with the latest hardware and software. You will have the opportunity to work in **Computer Systems Engineering, Hardware and Systems setup, Software Professional Services and Systems Support** for a blue-chip company. This is unique, professional experience at its best!

If you are interested in a company that is:

- Globally recognized as a **leader** in its field
- Provides excellent **opportunities** to employees
- **Committed to the development** and value of undergraduate interns

then this is the role for you!

The successful candidates will have the following attributes:

- A clear **communicator, team focused** and able to show extra-curricular involvement
- Demonstrably **organised** and technically very competent
- Be keen to gain some commercial experience under the guidance of inspiring managers
- Be willing to defer your study for 12 months, or study at night
- **Independent, clever and very capable**
- Be ready for a January 2005 start to full-time work
- Be 100% willing to learn in a great environment!

*Candidates can only be considered if they fill **all four** of the following criteria:*

- A **current undergraduate (Bachelors degree)**, not due for graduation from your degree before November 2005
- A *minimum* of **credit academics**
- Have full-working rights in Australia
- Be willing to defer your degree (or study at night) for one year to gain the best experience an undergraduate could hope for in a full-time capacity!

Our internship program provides for a phenomenal learning experience and incredible opportunities. Rub shoulders with the industry's most talented professionals and get the head-start on your career. **Graduate with a year of commercial experience** in a tough field – you will definitely be ahead of the pack!

Sound too good to be true? **Apply now! The last day we can accept applications for these truly fantastic opportunities is **September 20, 2004!****

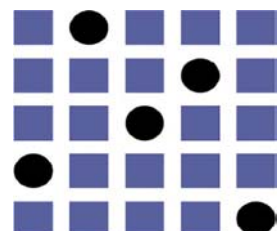

*Because when it comes to the future, we've always been ahead of our time.*

Please email your CV, Academic Transcript (unofficial soft-copy is fine and will be verified at interview) with cover letter to:
